- Electronic digital control module with monitoring/control facility and warning indicators;
- Automatic shutdown protection
- Emergency stop button (lock-down type)
- AC output circuit breaker with over-current protection;
- DC circuit control switch.

## The control module gives digital readouts of:

- Generator voltage;
- Output frequency;
- Engine speed;
- Battery voltage;
- Engine hours run.

#### Note:

- 1. The engine coolant temperature used temperature meter display;
- 2. The engine oil pressure used oil pressure meter display;
- 3. Generator current used current meter display and used change switch for each phase displayed separately

## The control module has indicators for failure information:

- Overspeed/underspeed,
- Emergency stop
- Low oil pressure;
- High water temperature
- Failure to start
- Battery charger failure

#### Automatic shutdown occurs under:
